

Solar Asset Protection & Monitoring

PROTECT YOUR SOLAR INVESTMENT

PV Secure provides intelligent theft and tamper detection systems specifically designed for commercial and industrial solar PV installations. The system detects panel lifting, movement, vibration, cable tampering and theft attempts, providing rapid notification and monitoring.

KEY BENEFITS

- Detects PV panel theft and tampering
- Detects earth cable and copper cable theft attempts
- Wireless installation with minimal disruption
- Long-life battery powered sensors
- Ideal for shopping centres, industrial sites, and office parks with PV installations

ENTERPRISE PACKAGE

- 1 x LTE/WiFi Hub
- 32 x Wireless Tamper Sensors
- Professional Installation
- System Configuration & Testing

PRICING (EXCL. VAT)

Hardware & Installation Package: R39,860

Monthly Monitoring Subscription: R890 per month

Annual Escalation: 6%

Battery replacements quoted at the time of replacement (batteries generally last 6 years).

WHY PV SECURE?

Protect your solar investment with a dedicated solar asset protection solution developed for commercial and industrial PV systems. PV Secure combines advanced wireless monitoring technology with Alcap's experience in solar project development, operations and maintenance.
